## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 – 28 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The use of the saturation ratio in determining the identification and quantification of the contaminant is considered critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). For example, on page 11 of the specification, it is unclear as to how the saturation ratio is used in determining the identity and quantity or concentration of the detected contaminant. In addition, the specification contains no working examples to demonstrate how the method is performed.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 – 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 – 28 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: Regarding claims 1, 17, 19, 21, 24, 25 and 27, it is unclear as

to how the saturation ratio is used in determining the identity and quantity or concentration of the detected contaminant.

***Allowable Subject Matter***

The indicated allowability of claims 19 and 24 is withdrawn. Prosecution is reopened.
